GSAT-SR Supervisor Scoring

The first step is to calculate an overall GSAT score. This is done by adding up all items answered and dividing by the number of items answered (do not include N/A in total number answered).

The second step is to score the four subscales. For each subscale you will need to add up all items and then divide that by the number of items answered in that subscale (do not include N/A in total number answered).

Once you have calculated both your overall GSAT score and your subscale scores, check the competency summaries to see which competency levels your scores relate to. This will highlight your strengths and areas for development as a supervisor.

It is highly recommended that when using the GSAT-SR to reflect on your application of supervision competency skills you plan time to discuss your results and reflections with your supervisor. If in addition to completing the GSAT-SR as a self-reflection exercise you have also asked your supervisee to complete a GSAT-SE it is important to spend time considering the intent of using the tools, the impacts on the supervisory working relationship, and how discussions on results will be facilitated and feedback results implemented in practice moving forward. Please refer to the **GSAT User Manual** for more information.

Note: It is recommended that consideration is given to application of N/A with **no more than 4 N/A in subscale 1 and subscale 4 and no more than 1 N/A in subscale 2 and subscale 3**. If the number of N/A for each subscale exceeds recommendations, then the scores will be affected. Reflection on the use of N/A's in relation to specific competency items is suggested when considering results.

Total overall GSAT-SR competency score (items 1 – 26)

Sum of all GSAT items answered:	Number of items answered (exclude n/a):	Total score - sum of all GSAT items answered divided by number answered: _____ *Compare your total score to the indicator band that most closely aligns to your score. Then read through the corresponding competency summary below.

Competency summaries

Absence of skill

0 Absence of essential skill where the skill/s should have been applied to the supervision working relationship to ensure effective supervision outcomes.

Inappropriate application

1 – 19 Inappropriate application or performance of essential skill/s. Practice consistently falls below the line of expected skill, knowledge, and behaviours for appropriate application of this skill which is likely to impact on supervisory outcomes. The supervisor is advised to seek support and training to improve application of skill in this area. It is recommended that the supervisor reflects with a third party (such as their supervising supervisor), on how to improve future supervision practice.

Limited skill

20 - 39 Limited knowledge or understanding of supervisory skills and techniques that at times are not accurate, do not achieve the intended outcome, or frequently fall below the standards for effective supervisory practice. This would indicate a need for reflection on application of skills with consideration of supervisory development learning goals, skills development and learning opportunities as part of regular supervision of supervision.

Foundational skill

40 – 59 Foundational application of competencies that reflect skills at the novice or developing level of experience. Has knowledge of supervision concepts, skills, principles, and behaviours. Has safe, sound foundational skills in translating competencies into practice and enhancing the supervisory relationship.

Proficient skill

60 – 79 Proficient practice skills with moderate level of expertise. Able to apply skills accurately and consistently to multiple competency domains. Can successfully facilitate discussions around these competencies, the application of and principles of each competency, and their importance in enhancing effective supervisory outcomes. Utilises resources to support goals and tasks. Demonstrates ethical practice and has a visible commitment to the supervisee's development. Establishes and maintains a healthy supervisory working relationship and upholds safe practice.

Advanced skill

80 – 89 Advanced level of skills and knowledge for providing supervision. Demonstrates a high level of capability in most competency domains. Confidently translates nuances related to supervision competencies to the supervisee in easily understood and relatable means. Uses processes or practices in supervision which improve the supervisory working relationship, and outcomes of agreed goals and tasks. Demonstrates ethical and safe practice to a high standard.

Expert

90 – 100 Expert supervisory skills that consistently exceed expectation, set an exceptional standard, are safe and ethically sound. At all times the supervisor displays a consistently high level of performance and expertise in relation to the skills, attitudes, values and behaviours of all competency domains. Demonstrated excellence in strategic application of skills and knowledge. Draws on a broad repertoire of strategies to facilitate supervision for the benefit of the supervisee.
